

# Multi Monitor Workstations

Designed where more than two monitors are required, our MVX range of multi monitor workstations can squeeze the most amount of power into tight space restrictions. Purposefully designed for clients where space is an issue, we can build small and fast workstations to power 4 or more screens using NVIDIA Quadro NVS technology. These workstations are particularly useful in the financial marketplace where a large amount of information needs to be displayed quickly and accurately.

NEC Display Solutions innovates, produces and delivers display products and total display solutions for a wide range of vertical businesses, specialist and lifestyle applications. NEC Displays has enjoyed unparalleled success with a large number of Fortune 500 companies. Offering the most comprehensive displays portfolio today, the company strives to increase customer value by offering best-of-class display solutions to the highest satisfaction of its partners and customers, backed with outstanding service and support.

Expand your desktop space with Ergomounts and their range of monitor brackets. Allowing you to mount 1 to 8 monitors to a single desk, they are a perfect accompaniment to your MVX Workstation and your NEC monitors giving your unrivalled access to all of your desktop space.
